Spring is a time of renewal! In this course, students will be reading and analyzing the myths of Persephone and Osiris alongside the traditions of Ostara and Easter. We will refine our technical writing through the study of punctuation, prepositions, and comparative adjectives to enhance descriptive clarity. By utilizing story mapping and character analysis, learners will uncover the symbolism within these narratives to inform their own creative compositions. Ultimately, students will apply these literary tools to draft formal letters and craft original springtime stories that reflect their unique voices.
